

## CE PDR-100

### Product Bulletin

**Description** A blend of environmentally friendly solvents specially formulated for removal of pipe dope residues within drill pipes and casings.  
CE PDR-100 is effective at dissolving and dispersing pipe dope prior to well stimulations and gravel packing operations. If not removed, pipe dope residues may cause formation damage and could adversely affect the production of the well.  
Extensive testing has demonstrated that the product works effectively and efficiently on a wide range of pipe dopes including metallic and non-metallic pipe dope products.

**Application** Used as supplied, either as a single pill treatment and reversed out, or as a pre-flush in a multi-phase treatment ahead of aqueous pills.

**Physical data**

Appearance	Clear and colourless homogeneous liquid
Odour	Characteristic odour
Solubility	Immiscible with water
Density	≈ 0.81 at 20°C
Flash Point	>75°C

**Packaging** Available in 25 litre and 210 litre poly drums. IBC or bulk volumes also available if required.

CE PDR-100 has been evaluated under the Offshore Chemicals Regulations in the UK. In accordance with the Harmonised Offshore Chemical Notification Format, it has been placed by CEFAS in the OCNS HQ band Gold with no Substitution warning. A CEFAS template and SDS is available on request.

Date of Review: 25/05/2021
